Wednesday Challenge Form

Group Members: Elisabeth, Jaden

Problem Statement: Build a structure that you received in a sketchup, build it, insert the pringle, then mail it.

Approach: We got the sketchup and examined it. After that we cut out the cardboard to make the box. Then we glued the box together. We then pulled apart cotton balls to create a more soft impact on the chip. After that we put in the chip and then filled the rest with cotton balls, and wrapped the whole thing in packing tape.

Solution:
